

Name: Priyush B. Khobragade

PRN: 211112018

Batch: 03

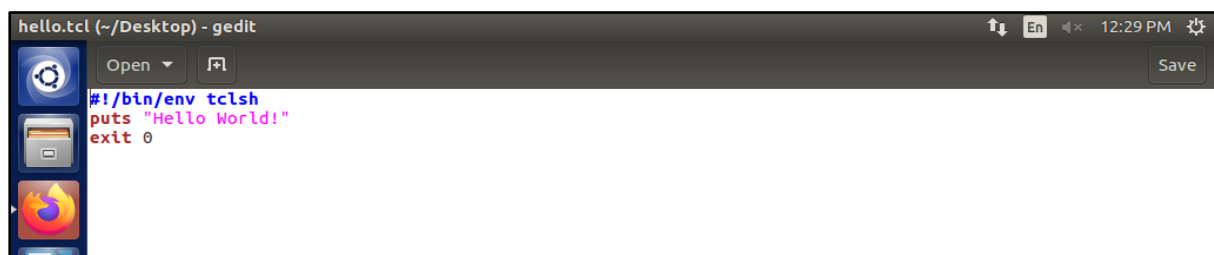

#### EXPERIMENT: 04

● **Aim:** Introduction to Tcl Hello Programming in NS2

● **Theory:**

- Open a text editor
- write the codes there and save it with .tcl file extension
- Open the terminal and execute the hello.tcl

**Code:**

```
hello.tcl (~/Desktop) - gedit
#!/bin/env tclsh
puts "Hello World!"
exit 0
```

**Output:**

```
dipak@dipak-VirtualBox: ~
dipak@dipak-VirtualBox:~$ ns hello.tcl
hello world
dipak@dipak-VirtualBox:~$
```

● **Conclusion:** Thus, we have written our first **tcl script and executed** it successfully in ns2.
